8 Served/Due to Belgian Blue**

to follow the Regular Weekly Sale of Dairy Cattle
which commences at 11.30am at

**FROME LIVESTOCK MARKET
WEDNESDAY 21st JANUARY 2009**

ALL STOCK IS SOLD IN ACCORDANCE WITH CONDIITONS OF SALE AS PRODUCED
BY THE LIVESTOCK AUCTIONEERS ASSOCIATION AS ON DISPLAY IN THE MARKET OFFICE

Foreword

This genuine sale arises due to the decision by the vendors to cease milk production and to concentrate on other parts of their farming business. The family have milked at Priory Farm since the late 1950's when Mr Stevens senior took over the tenancy. The herd has been removed to Frome Market for convenience of the sale.

Herd Management

The herd consists of home bred and purchased cattle with some replacements purchases made when required. Being loose housed they are milked twice daily through a modern 8/8 Tandem Parlour. Cows are fed concentrates in the parlour with additional winter supplement of maize and grass silage. The cows are predominantly Friesian Holstein and have an all year round calving pattern. Dams are served to Semex AI and a beef Simmental sweeper. Although not NMR recorded the herd is home recorded using the DP5 Dairy Plan System. Holstein AI sires used include Deslacs Shaquille (pin £37), Paradise-D Gilmore (pin £30). Beef sires include AI Norbreck Superb Blue (Belgian Blue) and 6 served/due to Harvey the Simmental Bull on the farm. Cephaguard and Orbeseal dry cow therapy is used at which time they are also given a Tribex fluke drench.

Current herd average: 6600 litres at 4.05%BF and 3.06%PR
Average cell count of those listed: 96

Herd Health

The holding is currently subject to a 48 month tuberculosis testing regime with a clear test being carried out in December 2006. The cows have all been vaccinated against the blue tongue virus and are Lepto Spirosis vaccinated with their annual booster due in February.

Herd Breakdown

10 1st Calvers, 17 2nd Calvers, 16 3rd Calvers, 8 4th Calvers, 12 5th-7th Calvers and 12 8th and over.

NB: The number shown in brackets relates to the collar number used and does not necessarily match the freeze brand on the cow.

Please Note: As is usual with herd dispersal sales, all cows and heifers that are stated in the catalogue to have been served not less than twelve weeks before the date of the sale and are shown to be PD positive will be guaranteed by the Vendor to be in-calf unless otherwise announced at the time of sale, but no guarantee can be given as to the date of calving or breed of calf. Any claim under this guarantee must be made in writing, and supported by a veterinary surgeon's certificate, to the Auctioneers within seven weeks of the date of the sale. Any other service dates are a statement of fact only and do not represent a warranty.
